

Fight the Flu.

The flu vaccine is now available!

Getting this vaccination is critically important to your health.

This year we are offering the flu vaccine at various times and locations across Los Angeles County to make it convenient for you. Below are your options to receive the vaccine:

Flu Facts

It takes about **two weeks after vaccination** for antibodies to develop in the body and provide protection against influenza virus infection. That's why it's better to get vaccinated **early in the fall**, before the flu season really gets under way. ¹

A flu vaccination is needed **every year** because flu viruses are always changing. The flu vaccine is reviewed each year and updated to keep up with those changes. ²
